内蒙古贺兰山盲蝽科二新种记述

田睿林 能乃扎布

(内蒙古师范大学生物系,呼和浩特 010022)

摘要 该文描术了分布在内蒙古阿拉善盟贺兰山盲蝽科(Miridae)合势盲蝽属 Orthotylus Fieber 二新种即圆柏合垫盲蝽 O. (Pinocapsus) sabinae sp.nov. 和阿拉善合垫盲蝽 O. (P.) alashanensis sp.nov.

关键词 内蒙古,合垫盲蝽属,新种

作者在整理內蒙古合垫盲蝽属 Orthotylus Fieber 昆虫标本时^[1~4],发现分布在阿拉善盟 贺兰山的二新种^[3~9],现记述如下。模式标本存于内蒙古师范大学生物系标本室。本文所用 长度单位为 mm。

1 圆柏合垫盲蝽 Orthotylus (Pinocapsus) sabinae sp. nov., 新种(图1)

寄主: 叉子圆柏 Sabina vulgaris Antoine

本新种与 O. (P.) fuscescens (Kirschbaum) 相似,但新种后足胫节短于其跗节长的 4倍,头顶宽为复眼直径的 $1.16\sim1.33$ 倍(雄); $1.20\sim1.60$ 倍(雌),雄虫抱器的形状等特

图 1 圆柏合垫盲蝽 O. (P.) sabinae sp.nov., 新种(含)
1. 成虫 (male adult); 2. 阳茎 (phallus); 3~5. 左抱器, 不同观面 (left paramere, different views);
6~8. 右抱器, 不同观面 (right paramere, different views)

征相区别[3]。

2 阿拉善合垫盲蝽 Orthotylus (Pinocapsus) alashanensis sp.nov., 新种 (图 2)

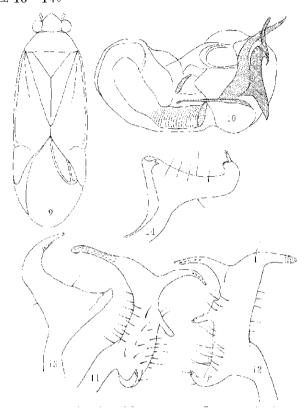

图 2 阿拉善合垫盲蝽 O. (P.) alashanensis sp.nov., 新种(♂) 9. 成虫 (male adult); 10. 阳茎 (phallus); 11~12. 左抱器,不同观面 (left paramere, different views); 13~14. 右抱器,不同观面 (right paramere, different views)

寄主: 叉子圆柏 Sabina vulgaris Antoine

正模♂內蒙古阿拉善盟贺兰山,1994-06-23,田睿林采;配模♀同上,齐宝瑛采,副模 2 ∜ 、5♀♀同正模。

该新种近似于圆柏合垫盲蝽 O. (P.) sabinae sp.nov., 但体黄绿色, 左抱器分 4 枝, 右抱器顶端无刺等特征易相区别。

TWO NEW SPECIES OF MIRIDAE FROM MT. HELAN OF INNER MONGOLIA AUTONOMOUS REGION, CHINA

Tian Ruilin Nonnaizab

(Department of Biology, Inner Mongolia Normal University, Huhhot 010022)

Abstract This paper deals with two new species of *Orthotylus* Fieber from Alashan region of Inner Mongolia Autonomous Region. All type specimens are deposited in the Department of Biology, Inner Mongolia Normal University. The measure unit used in description is mm.

Orthotylus (Pinocapsus) sabinae sp. nov. (Fig. 1)

The new species is related to O. (P.) fuscescens (Kb.), but can be distinguished from the latter by: tibia of hind leg shorter than 4 times of tarsus length, vertex ${1.16}\sim1.33$, ${1.20}\sim1.60$ times width of eye, body length ${3.36}\sim3.89$, as well as the form of parameres. Holotype ${1.00}$. Type locality: Helan Mountain, Alashan League, Inner Mongolia Autonomous Region. Collected: June 25, 1994, by Tian Rui-lin. Allotype ${1.00}$, same data as the holotype, collected by Qi Bao-ying. Paratypes: ${1.00}$, ${1.00}$, same data as the holotype.

Orthotylus (Pinocapsus) alashanensis sp. nov. (Fig. 2)

The new species is similar to O. (P_{\cdot}) sabinae sp. nov., but differs in: body yellowish green, left paramere 4-branched and hypophysis of right paramere without denticles. Holotype δ . Type locality: Helan Mountian, Alashan League, Inner Mongolia Autonomous Region. collected: June 23, 1994, by Tian Rui-lin. Allotype \mathcal{P} , same data as the holotype, collected by Qi Baoying. Paratypes: $2 \mathcal{F} \mathcal{F}$, same data as the holotype.

Key words Inner Mongolia Autonomous Region, Orthotylus Fieber, new species
